

3rd Street Bicycle Lanes RFQ

Responses to Submitted Questions

1. Will the survey need to include both sides of the corridor or just one specified side?

Response: The survey should include both sides of the corridor.

2. Is there a need for any SUE investigation of underground utilities in the area?

Response: Yes. The RFQ should have included a requirement for SUE – Level B for the following segments of the corridor:

- From the 3rd Street tunnel entrance to West Peachtree Street
- From Peachtree Street to Juniper Street

3. Will the survey be for the entire length of the project site map or just for the orange sections?

Response: The survey should be for the entire length of the 3rd Street corridor as defined in Exhibit A – Project Site Map.

4. Are inverts needed for storm and sewer along the route? If so, this will possibly entail including some traffic control to safely access them.

Response: Inverts are not needed at this time.

5. Is there a budget for this project?

Response: The current budget for this scope of work is \$150,000.
