OVERVIEW: MOVING FORWARD WITH
Blueprint Midtown 3.
Moving Forward with Blueprint Midtown 3.0

This document is a summary of the Blueprint Midtown 3.0 (BPM 3.0) master plan, which can be found here.

Blueprint Midtown (BPM) 3.0 is a comprehensive plan to guide Midtown Atlanta’s growth over the next three decades. It is a living document, one that will be updated over time, but maintains its core principles. The overriding goal of BPM 3.0 is to ensure that Midtown gets even better as it grows, both for those here now and those coming.

The original BPM was put in place in 1997, and updated in 2005. A lot has changed since then. Updating the plan now allows the Midtown Alliance to take full advantage of the opportunities that are here and coming; recalibrate the plan to ensure it remains highly effective and actionable; and re-energize the community around a unified and renewed vision that is both exciting and achievable.

Blueprint Midtown 3.0 builds on recent successes, incorporates previously completed studies and corridor plans, and refines site-specific recommendations. It was developed with extensive input from more than 6,000 Midtown employers, property owners, residents, workers, visitors, public-sector partners and subject-matter experts in a robust discussion of Midtown’s future in 2015-16. This outreach ranged from charrettes and mapping exercises to community surveys. Through this work, we were able to get a clear understanding of both priorities and opportunities for Midtown’s future to inform this plan update.

Peachtree Street: 1950’s
Today, the Midtown core is a thriving, 1.2 square mile mixed-use district in the heart of Atlanta, prized for its walkable, tree-lined streets linking the city’s premier arts and cultural attractions, parks, restaurants, residents and major employers. Over the last two decades, the pace of new development in Midtown has been astonishing, with more than 60 major high-rise developments delivered.
In 2016, 25% of land in Midtown's 1.2 square mile district is ripe for development.
The Opportunity

As much activity as Midtown has experienced over the last two decades, the next two will bring even more profound change. Midtown is well-positioned to accommodate the incoming growth.

With its networked street grid and complete ease of access to transit, the physical “bones” are in place for Midtown to continue to grow as a premier live, work, and play destination. While the pace of new development will fluctuate with market conditions, with 25% of land in the Midtown core available for development or redevelopment, Midtown can expect to see strong growth as people and companies are attracted to its central location and urban amenities. This is consistent with the nationwide trend of cities capturing ever-larger shares of growth in mixed-use centers. These trends are even more pronounced in urban districts like Midtown that offer a vibrant urban lifestyle with a variety of restaurants, shopping and entertainment venues along with an abundance of talent, employers and residential choices in a walkable, transit-rich environment.

Midtown must deliver an exceptional urban experience on every dimension: unparalleled walkability, active streetlife, abundant travel choices, ease of access and a clean, safe and attractive public realm. People thrive in places that are well-designed and engaging at the street-level. Furthermore, each new development will stand for the next century. We have one chance to get it right. Midtown is uniquely positioned to deliver this experience, and Midtown Alliance is committed to work relentlessly to achieve this vision.

One of the functions of the Blueprint Midtown 3.0 planning process is to project future development based on the amount of available land in Midtown, development projects in the pipeline, and the pace and type of development that has happened over the last 10 years. Blueprint Midtown is a build out plan, and as such, envisions the future of Midtown approximately 30 years from now when it has reached its full development potential.

FUNDAMENTALS

This plan reflects the essential principle that great urban environments begin at the street level.

This plan calls for:

- Sidewalks and streets that encourage walking, biking and transit;
- More public spaces and plazas, ranging from small button parks to larger civic gathering areas, that are active and dynamic with enhancements, programming and public art;
- New development/redevelopment designed to be visually appealing, that embrace and activate the sidewalks and public realm and that encourage transportation alternatives while reducing reliance on the single-occupant automobile;
- A diversity of retail destinations to better serve Midtown’s consumer market.

TOOLS

The Midtown Alliance has a long track record of not just planning, but also implementation.

Tools that support implementation of this plan include:

- Requirements for new development embodied in zoning and development regulations (including building and site design, land use, density);
- Infrastructure investments to be implemented and/or advocated (transportation, public space, catalytic public improvement projects);
- Partnerships to achieve shared objectives through creative solutions;
- Guidance and recommendations for new development and/or enhancements on private property (building design at the street-level; retail spaces; suggested public space enhancements, etc.);
- Supportive programs to be undertaken by the Midtown Improvement District/Midtown Alliance (clean & safe, urban design, transit advocacy, etc.).

ORGANIZATION

BPM3.0 focuses on both broad and place-based improvements.

Blueprint Midtown 3.0 is organized into three sections and an appendix:

- District-wide Recommendations
- Character Area Recommendations
- Appendix: Project Plans

Recommendations:

Overview

The results of extensive community outreach for this plan reinforce a vision for Midtown that has remained generally consistent over time: a livable, walkable district where people, business and culture converge to create a community with a distinctive personality and a superior quality of life.
Overall Goal: Coordinate with private development to deliver a high-quality, pedestrian-friendly, urban environment that meets the needs and desires of the Midtown community.

INITIATIVES

• Continue to have a balance and mix of uses - office, housing, retail, and hotel - to make areas active at various times of day.

• Support anchor institutions and cultivate economic clusters like Tech Square, Savannah College of Art & Design, Emory University Hospital Midtown, by fully leveraging these ecosystems. This may include things like more flexible office spaces where start-ups can grow and scale as they graduate from incubators or accelerators.

• Promote a diversity of housing types, including larger units that can accommodate growing families and smaller units/micro-units.

• Explore affordable housing strategies in coordination with the City of Atlanta’s larger objectives.

• Encourage residential development to achieve a better jobs-housing balance.

• Ensure consistent design quality of new development that embraces the public realm and provides an active, pedestrian-oriented environment.

• Organize Midtown’s corridors into street types to concentrate retail space, active ground-floor uses, and vehicular site access.

• Concentrate shopping and dining establishments on designated streets to develop a deliberate mix of shopping and services by corridor/node.

• Incorporate sustainable building design into new development and redevelopment to ensure resource efficiency and quality (water, energy, air).

• Continue to require that buildings graduate in height along Juniper Street and Piedmont Avenue to transition from the commercial district into the adjacent single family neighborhoods.

• Development of new ground floor space should exhibit the following criteria:
  • Spaces that allow for flexibility in use and are able to adapt to future conditions and changing retail uses;
  • 40’ retail bay depths, 75% fenestration, and doors that lead directly to the public sidewalk on designated retail corridors.
  • Storefronts and signage that are differentiated by each business to reflect the brand of the retailers; and
  • Ground-floor spaces that when used for building services are easily retrofitted for retail uses in the future.
  • Preserve and enhance historic buildings, sites and districts that reflect Atlanta’s cultural, social, economic and architectural history.
Building Design
The lilli Midtown tower plays with massing and articulation to create a sleek but dimensional facade that is further enhanced by glass and rooftop greenery.

Street-level Experience
Awnings, signage, articulated storefronts, and active uses at the ground-floor make for a dynamic street scene at 12th & Midtown.

Parking
A wind-responsive facade serves to conceal structured parking and provide an artistic focal point for EVIVA Peachtree, a proposed development in Midtown.

Building Sustainability
1315 Peachtree Street, a LEED Platinum certified building and one of the greenest buildings in the world, exemplifies environmental sustainability standards for Midtown.
Recommendations:
Transportation

Overall Goal: Continue to invest in Midtown’s infrastructure to make the district safer and more accessible, vibrant, and multi-modal. Undertake an integrated approach to transportation enhancements that provides safe access and mobility for all users, including pedestrians, bicyclists, transit riders of all ages and abilities, as well as motorists.

INITIATIVES

• Continue to improve walkability through investments in streetscapes and signalized and striped pedestrian crossing crossings.

• Build out a safe and connected bicycle network.

• Improve local and regional transit connections and frequency.

• Undertake intersection improvements that mitigate congestion and conflicts.

• Improve connectivity for Midtown’s street grid through street extensions, new connections across the Interstate highways, and pedestrian pathways.

• Enhance Midtown’s multi-modal network through street configuration projects that increase circulation, navigability, and connectivity for all users.

• Expand employer-commuter programs and customized support through the Midtown Transportation program.

• Accommodate service-based and technology solutions like on-demand ridesharing, car sharing and bike-share.

• Strengthen connections from Midtown to the rest of the region and build gateways into the district.

• Plan for technological innovations such as autonomous vehicles that may transform the nature of transportation.
This project focuses on the implementation of a pedestrian and cyclist bridge that can offer a much needed safe passage across the interstate in order to create a proper human-scaled connection between Midtown and Georgia Tech/Westside.

Transformations for Juniper Street and Piedmont Avenue will enhance the multi-modal options and improve aesthetics along the corridors while also focusing on sustainable design. This includes bioswales, native plantings, LED lighting, and other low-impact design alternatives.

Extending 15th Street from W. Peachtree to Williams Street and bridging the Connector will provide improved east-west connectivity, relieve pressure on 14th Street and provide a safe opportunity for cyclists to connect to the core of Midtown.

Enhancements for Spring & West Peachtree Street include re-purposing one travel lane on each street to create a buffered bicycle facility as well as sidewalk improvements, bus shelters, and other traffic calming strategies.

Transformations for Juniper Street and Piedmont Avenue will enhance the multi-modal options and improve aesthetics along the corridors while also focusing on sustainable design. This includes bioswales, native plantings, LED lighting, and other low-impact design alternatives.

This project focuses on the implementation of a pedestrian and cyclist bridge that can offer a much needed safe passage across the interstate in order to create a proper human-scaled connection between Midtown and Georgia Tech/Westside.
**Public Spaces**

**Overall Goal:** Build out a network of permanent and temporary parks, plazas, courtyards, and multi-purpose spaces that are safe, well-designed, environmentally sensitive, and activated to provide for recreation, leisure, health, and human connections in this dense urban environment.

**INITIATIVES**

- Embrace Midtown’s streets as fundamental public spaces by creating corridors that are unique, active and engaging.

- Coordinate with property owners to make existing privately-owned, publicly accessible green spaces and plazas more functional and accessible.

- Create permanent signature parks to serve Midtown by purchasing property or re-purposing and enhancing other publicly owned land.

- Ensure appropriate programming to enliven and activate publicly-accessible spaces (such as games, public art, kiosks, etc.)

- Incentivize developers to incorporate well-designed, publicly-accessible parks, plazas, courtyards, and multi-purpose spaces into their projects to add to a network of community parks of varying scales.

- Continue to develop and maintain temporary and permanent smaller open spaces or “pocket” parks in high visibility locations.

- Ensure a clean, safe and highly-attractive public realm through state of the art public safety, maintenance and landscaping operations.

- Build functional and attractive gateway elements at major entrances into the district that provide a sense of arrival, such as new transit station and lighting enhancements, and bridgescapes.

- Design public spaces to be environmentally sustainable through materials selection and resource-efficient operations.

- Explore longer-term opportunities that include capping the interstate.
Future Projects

- Signature Park
- Neighborhood Park
- Open Space Component
- Art Walk
- Open Space/Activation Node
- Highway Beautification

Existing Network

- Open Space
- Convertable Lawns/Hardscapes
- Open Space/Activation Node

Greenspace Network

Art Walk
This project will transform Peachtree Walk and Cypress Street into a unique pedestrian experience punctuated by creative design treatments, lighting, and interactive artistic elements along a one-mile walk between the North Ave and Arts Center MARTA Stations.

Ponce Terminus
An early concept for a full-block development site bounded by Spring St, W. Peachtree St, Ponce De Leon Ave and 3rd St envisions major mixed-use development alongside a permanent, publicly accessible, signature park.

Activation Partnerships
Midtown Alliance’s collaboration with the private sector to enhance and activate property yields pocket parks such as this one located at 10th Street and Peachtree Street.

“Hearts of the Arts” Placemaking
This initiative concentrates artwork and arts-centric programming in strategic, high-visibility locations to reinforce Midtown as a vibrant, engaging arts district.
Character Areas: Overview

This section explores the diverse areas within the Midtown Improvement District that help make it a truly dynamic neighborhood. The analysis focuses on the unique opportunities each offers, as well as placemaking strategies and catalytic projects that will positively influence the future development of these areas, increase vibrancy, and drive quality investment and economic development.
Character Area: Arts

Vision: Reinforce the Arts area as the Atlanta region’s cultural and creative epicenter anchored by strong arts and cultural institutions and a highly visual urban experience with public art, street-level galleries, boutiques, artist studios and outdoor dining.

DEFINING CHARACTERISTICS

The Arts area includes one of the Atlanta region’s premier arts anchors, the Woodruff Arts Center, which includes four arts institutions on one campus: the High Museum of Art, the Atlanta Symphony Orchestra, and the Alliance Theatre, and Arts for Learning. Additional assets reinforce this area’s identity as the epicenter for arts and culture, including the Museum of Design Atlanta, the Savannah College of Art and Design Atlanta and their Digital Media Center, the Center for Puppetry Arts, and Breman Jewish Heritage Museum.

CATALYTIC PROJECTS
Character Area: Commerce

Vision: Further enliven the Commerce area with significant public space amenities and enhanced connectivity to the rest of the region, sustaining it as a vibrant, walkable, corporate location of choice amenity-rich, premier office location.

DEFINING CHARACTERISTICS

The Commerce area is anchored by a core of prestigious Class A office buildings, including Colony Square, the Federal Reserve Bank of Atlanta, the Proscenium, Ten 10th Street, and Regions Plaza, 1180 Peachtree, and 1075 Peachtree Street.

CATALYTIC PROJECTS
Character Area: Research & Technology

West side of Midtown from North Ave. to 10th St.

Vision: Amplify the energy of the Research & Technology area that unites research, learning, and entrepreneurship, and strengthen its collaborative environment by building high performing, dense development and third places such as cafes, co-working spaces and public parks.

DEFINING CHARACTERISTICS

The Research & Technology area is defined by the presence of Georgia Tech, as well as a rich array of business incubators, start-ups, corporate innovation centers, a growing amount of privately-owned student housing, and corporate campuses including AT&T and NCR Corp.

CATALYTIC PROJECTS
**Character Area:**

**Landmark**

Vision: Embrace the stylish, urban character of this Landmark area that abounds with architectural gems, from historic assets to striking high-rises, and highlight its verdant personality with green streetscapes and street-level shops, restaurants, and cafes.

**DEFINING CHARACTERISTICS**

The Landmark area includes historic and modern architectural landmarks as well as a significant residential population and retail along Peachtree Street. Some of this area’s most iconic destinations include Piedmont Park, the Atlanta Botanical Garden, the Fox Theatre, and Margaret Mitchell House.

**CATALYTIC PROJECTS**
Character Area: Medical

Vision: Develop the Medical area as a thriving health and wellness district that encourages walking and biking for travel and leisure, provides access to fresh foods through grocery stores, farmers markets, and community gardens, and offers amenities such as quality greenspace, recreational facilities, and a concentration of destinations for shopping, dining and entertainment.

DEFINING CHARACTERISTICS

The Medical area of south of North Avenue is at the crossroads between Downtown and Midtown and includes the St. Lukes Episcopal Church, the Bank of America Plaza, One Georgia Center, Shakespeare Tavern, the Peachtree-Pine homeless shelter, two MARTA rail-stations (Civic Center and North Avenue) and Emory University Hospital Midtown.

CATALYTIC PROJECTS
