

2022 Yarn Bomb Installation Locations

 Purple stars are Narrow Lamp Posts (18inches X 5feet): Black lamp posts with LED lights and a hat shaped cover. The Wheaton banners are installed on these lamp posts. Image example is below

 Blue rectangle is the Handrail Panels (45inches X 30inches). These are hung with a narrow 44" PVC pipe to keep the top of the panel straight between upright posts of the Metro ramp handrails. The panels are installed with medium to large Zip Ties. The panels are draped on the outside of the ramp handrails, so the entire panel is outside the wire and metal handrails. There has been one incident in all the years of the Yarn Bomb of vandalism to these Handrail Panels. Two were lost due to fire in 2022 during installation season (summer). Due to this it was decided to attempt to do large installation events and to attempt to educate the community about the Yarn Bomb more during those times. Also, it was decided to keep the Handrail Panels off of the entry and exit sections of the ramp.
