

GOOD THINGS COMING

Towards the end of March, JBG SMITH will begin construction at 1900 Crystal Drive on two new luxury apartment buildings featuring 810 units and approximately 40,000 square feet of street-level retail.

This exciting project may create changes for our everyday pedestrian routines. Here's what to expect in the next few months:

- The southern sidewalk along 18th Street will be closed; pedestrians should use the north side of 18th Street to access Crystal Drive and S. Clark Street.
- The western sidewalk along Crystal Drive will be closed; pedestrians should use the jersey barrier, protected lane to travel north and south along Crystal Drive.
- The northern sidewalk along 20th Street will be closed; pedestrians should use the jersey barrier, protected lane to access Crystal Drive and S. Clark Street.

We'll continue to communicate as construction progresses—if you have any questions, please email 1900CrystalDrive@jbgmsith.com.

NEW HAPPENINGS

Above: Check out the alternative routes and closures during construction. As construction progresses, closures and routes may change. We will keep you updated along the way.
